CALENDAR - OUR ACHIEVEMENTS

- 
- 1966** Zakład Elektronicznej Techniki Obliczeniowej (ZETO, Eng. Electronic Computing Technique Company) was founded in Rzeszów. ZETO of Rzeszów, equipped in "ODRA 1013" computers, started its pioneer activity from optimization of brick delivery from 55 brickyards to 189 trade facilities at the request of the then Centre of Construction Materials in Rzeszów.
 - 1974** Field office of ZETO in Krosno was opened.
 - 1977** ZETO opened a field office in Przemyśl.
 - 1980** ZETO of Rzeszów became independent thanks to modernization and development.

While working on subsequent generations of "ODRA" computers, ZETO of Rzeszów achieved in the 80s IBM technology, firstly recreated in the form of RIAD 32, and finally in 1990 the original: IBM 4341.
 - 1991** On the tide of the political changes Zakład Elektronicznej Techniki Obliczeniowej transforms into a company and from then on it has been known under the name of ZETO-RZESZÓW Sp. z o.o.
 - 1993** Due to the constant development the company bought a building at Rejtana Street 55, which after the renovation in 1995 became the company's main office.
 - 2002** The company, as the first one in Poland, obtained the status of Regional Coordinator of CDN S.A. network. Currently it is Partner of Comarch ERP XL and Comarch ERP Optima.
 - 2003** The company obtained certificate of Quality Management System compliant with ISO 9001:2000.
 - 2005** ZETO-RZESZÓW Sp. z o. o. opened Regionalne Przedstawicielstwo Polskiego Centrum Certyfikacji Elektronicznej "SIGILLUM" (Eng. Regional Agency of the Polish Centre of Electronic Certification "SIGILLUM").

One of the most modern server rooms in Podkarpacie was created.
 - 2006** POSD (Podkarpacki Ośrodek Szkoleniowo Doradczy, Eng. Business Support Centre of Podkarpacie) was created, which belongs to ZETO-RZESZÓW capital group. POSD acts in the area of three main domains: trainings, advisory and eu subsidies.
 - 2009** ZETO-RZESZÓW for the first time became the Golden Partner of Microsoft. Currently we have been the Golden Partner for Competence of OEM Hardware Gold.
 - 2010** Integration of the Quality Management System and Information Security Management System took place – the company obtained the Certificate of Integrated System of Quality and Information Security Management which complies with the norm PN-EN ISO 9001 : 2009 and PN-ISO/IEC 27001 : 2007. Unit for backups was created (backup, servers and applications).
 - 2011** The Department of System Integration and Programming was created.
The company extended its offer of a new business approach: „Cloud computing”.
 - 2012** ZETO-RZESZÓW Sp. z o.o. was then 45 years old.
A reorganization of some departments of the company and the field office in Przemyśl took place. The company signed new partnership agreements, broadening its offer.
 - 2013** HR Department came into being. A project concerning a broad cycle of trainings of all company departments and field offices was implemented.
 - 2014** The company underwent reorganization of work and management. A new organization structure was created. The brands of ZETO365.pl and ZETOHOSTING.pl came into being.
 - 2015** The renewal of the Certificate of Integrated System of Quality and Information Security Management takes place. The field office in Krosno is under reorganization.

WHY US?

Dynamism of changes in today's business reality makes the companies of the 21st century, including our ZETO-RZESZÓW constantly monitor the arrival of innovative solutions and new technologies.

New business models, which now play a significant role in our company life, create our products. Computing cloud and mobile solutions have become a standard. It is impossible to think about development of your business without them. The possibility to obtain information in real time decides about us being in the game or out of it, whether our offer is competitive or not.

Today many decisions are taken by the directors of companies, departments or branches on the spot, when they work at home; they are on the road, on a business meeting in the other part of the world or Europe. The opportunity of flexible management thanks to the use of technology and mobile tools is a fact. This is why having a good business partner is so important in business. The Partner, who has already tested and verified solutions, which can combine them and implement them correctly to the needs of the conducted business. The Partner, who feels at home in the reality of scale and innovative solutions, which are adjusted to the constantly evolving specificity of work and changing law.

We are constantly facing a huge challenge of curbing growing costs. The solutions we propose do not only limit the costs but they stabilise them and help control their dynamics at every moment. In the foreseeable future every significant company will use cloud solutions in the greater extent than today. It concerns micro-enterprises, as well as "fast growing" enterprises.

Software and IT device producers will discreetly "force" us into it by introducing more and more advanced solutions based on a cloud. The cloud for which today there is not sensible alternative. The challenge which every owner, president, director or manager faces today is difficult, because each of us has to decide whether to treat the cloud as an IT project or a business one. I leave you with this question and I wish to thank you for your attention.
